

Changing Roles: Wildland-Urban Interface Professional Development Program

A training program produced by

Southern Group of State Foresters
**USDA Forest Service, Southern Center for Wildland-
Urban Interface Research and Information**
**University of Florida, IFAS Extension, School of Forest
Resources and Conservation**
**U.S. Fish and Wildlife Service, National Conservation
Training Center**

2006

The South is changing from a predominantly rural landscape to an urban one. Rapid population growth and land-use changes are increasing development, often with tremendous effects on forests, other natural areas, and communities. When forest remnants are left between these developed areas, the fragmented landscape presents challenges to natural resource professionals working to reduce risks and maintain healthy forest ecosystems. Further complications result from the demographic changes that are bringing new cultural and social values to the rural South. As a result, the wildland-urban interface requires a new approach to forest management to protect these natural areas and the ecological benefits they provide. Strategies are also needed to encourage and educate the growing number of new and diverse residents about the importance of conserving resources in the interface.

Conserving and managing natural resources, while protecting the public from risks in the interface, is part of the mission of state forestry and other natural resource agencies. Urbanization complicates this mission with new challenges, but also provides new opportunities.

As communities grow, citizens become more involved in protecting what they cherish: natural vistas, cultural heritage, water quality, wildlife habitat, opportunities for outdoor recreation, and a healthy economy. It is imperative for natural resource professionals to be active participants in these local land-use decision-making processes. They can communicate the role of the environment in quality of life issues and improve understanding of how local decisions affect forests and other natural areas. This is no easy task. Employees of state forestry and other natural resource management agencies must gain new skills and learn to convey information to new audiences.

Changing Roles: Wildland-Urban Interface Professional Development Program was designed to assist agencies at the forefront of this transition in the southern landscape. Our region has the greatest private land ownership and the fastest population growth of any other region of the nation. These training materials will help agency staff better understand the wildland-urban interface issues within a local policy framework and communicate about the management of forests and other natural areas with the best available science.

We hope you find these materials to be useful catalysts for meeting the challenges of changing resources and changing roles.

Steven Scott, Chair, Southern Group of State Foresters

Peter J. Roussopoulos, Station Director, Southern Research Station, USDA Forest Service

Ken Arney, Deputy Regional Forester, State and Private Forestry, Southern Region, USDA Forest Service

Sam Hamilton, Regional Director, U.S. Fish and Wildlife Service

Jimmy G. Cheek, Senior Vice President, Agriculture and Natural Resources, University of Florida

Table of Contents

Acknowledgments

Trainer's Introduction

Using This Program

Trainer's Introduction

Program History

Module Topics

Materials Included

Strategies for Creating Program Agendas

Program Evaluation

Suggestions for Planning a Professional Program

Summary

Module 1: Wildland-Urban Interface Issues and Connections

Trainer's Guide

Using this Module

Background

1. What is the Wildland-Urban Interface?
2. What Are Key Issues in the Interface and What Are Their Interconnections?
3. Why Focus on the Wildland-Urban Interface?
4. What Knowledge, Skills, and Tools do Resource Professionals Need to be Most Effective in the Interface?

Summary

Supporting Materials

Suggested Readings

References

Exercises

- 1.1 Piecing Connections Together
- 1.2 Describing the Interface
- 1.3 Prioritizing Interface Issues
- 1.4 Using Case Studies
- 1.5 Weaving Connections
- 1.6 What Would You Do?

Presentations

- 1 Wildland-Urban Interface Issues and Connections Overview
 - 1.1 What is the Wildland-Urban Interface?
 - 1.2 Key WUI Issues in the South
 - 1.3 Why Focus on the WUI?
 - 1.4 Skills Needed by Natural Resource Professionals

Video

When Nature Is at Your Doorstep

Module 2: Managing Interface Forests

Trainer's Guide

Using this Module

Background

1. Understanding Interface Landowners
2. Opportunities Realized through Interface Forest Management
3. Vegetation Management of Interface Forests

Summary

Suggested Readings

Fact Sheets

- 2.1 Who Are Interface Landowners?
- 2.2 Generating Income from Interface Forests
- 2.3 Reducing Fire Risk
- 2.4 Amenity Resources
- 2.5 Forest Health
- 2.6 Wildlife
- 2.7 Water Management
- 2.8 Practicing Visible Stewardship
- 2.9 Mechanical Vegetative Management
- 2.10 Forest Cooperatives

Exercises

- 2.1 Who Lives in the Interface?
- 2.2 Creating a Department of Interface Resources
- 2.3 Advertising Interface Services
- 2.4 Using Case Studies
- 2.5 Interface Moneymakers
- 2.6 Firewise Conversations
- 2.7 Scenery and Trails
- 2.8 Promoting Forest Health
- 2.9 Wild Stories
- 2.10 Cues-to-Care
- 2.11 Debate: Cues-to-Care vs. Screening Buffers
- 2.12 Balancing Ecological, Social, and Economic Concerns
- 2.13 Juggling Multiple Objectives

Presentations

- 2 Managing Interface Forests Overview
- 2.1 Understanding Interface Landowners
- 2.2 Opportunities with Interface Forest Management
- 2.3 Vegetation Management of Interface Forests

Module 3: Land-Use Planning and Policy

Trainer's Guide

Using this Module

Background

Introduction

1. Tools for Land-Use Decision Making
2. Opportunities for Natural Resource Professionals
3. Becoming a Community Resource

Summary

Suggested Readings

References

Glossary

Fact Sheets

- 3.1 Some Policies and Programs that Affect Natural Resources
- 3.2 Zoning Ordinances
- 3.3 Smart Growth Principles
- 3.4 Some Negative Effects of Urban Sprawl
- 3.5 Subdivision Design
- 3.6 Land Conservation Tools
- 3.7 Best Management Practices in the South

Exercises

- 3.1 Making the Link—Policy in the Interface
- 3.2 Tracking the Policy Process
- 3.3 Creating a Statement
- 3.4 Practicing Land-Use Planning
- 3.5 Understanding Conservation Development
- 3.6 Using Case Studies
- 3.7 Guiding Neighborhood Policy
- 3.8 Role-Playing Development Decisions
- 3.9 Background and Discussion Questions for Case Study 18

Presentations

- 3 Land-Use Planning and Policy Overview
- 3.1 Land-Use Policy and Zoning
- 3.2 Land-Use Planning
- 3.3 Conservation Design
- 3.4 Opportunities for Natural Resource Professionals
- 3.5 Becoming a Community Resource

Module 4: Communicating with Interface Residents and Leaders

Trainer's Guide

Using this Module

Background

Part I: Communication Foundations

1. How to Communicate Effectively
2. Considering the Sender
3. Engaging an Audience
4. Considering the Message
5. Putting it all Together

Part II: Interface Communication Skills

6. Getting to Know the Audience
7. Building Support for Change
8. Planning a Program

Summary

Supporting Materials

Suggested Readings

References

Fact Sheets

- 4.1 Communication Basics
- 4.2 Starting an Informal Presentation
- 4.3 The Language of Conservation
- 4.4 The Power of Information
- 4.5 Tools for Understanding Audiences
- 4.6 Working with African American and Hispanic Communities
- 4.7 Addressing Misconceptions about Wildland-Urban Interface Issues
- 4.8 Communication Challenges—When People Will Not Agree
- 4.9 Reducing Conflict
- 4.10 Social Marketing Tools
- 4.11 Planning a Communication Program

Exercises

- 4.1 What Went Wrong?
- 4.2 Perception is Reality
- 4.3 Questions to Build Understanding
- 4.4 An Edict to Edit
- 4.5 Connecting Prose to People
- 4.6 Critiquing Brochures
- 4.7 Using Case Studies
- 4.8 Knowing the Community
- 4.9 Working with Conflicts
- 4.10 Understanding Social Marketing
- 4.11 Event Planning

Presentations

- 4 Communicating with Interface Residents and Leaders Overview
- 4.1 Communication Foundations
- 4.2 Critiquing Brochures
- 4.3 Conflict Resolution
- 4.4 Social Marketing
- 4.5 Program Planning

Case Studies

- 1 The Challenge of Controversial Resource Issues: Southern Pine Beetle
- 2 Conservation Development in South Carolina
- 3 Cooperation is the Key: Blue Ridge Forest Landowner Cooperative
- 4 Deer Debate in Hilton Head, South Carolina
- 5 The Domain: Managing Interface Forests in Tennessee
- 6 Improving the Urban Forest in Roanoke, Virginia
- 7 Interface Issues in the Georgia Mountains
- 8 Island Interface Issues: Puerto Rico and the Virgin Islands
- 9 Karst Habitat Restoration in Arkansas
- 10 Land Conservation along the Suwannee River
- 11 Life on the Edge: Interface Issues in Bastrop, Texas
- 12 Mediating for Change in Martin County, Florida
- 13 A Multi-Agency Initiative: Water Education in Kentucky
- 14 New Urbanism in South Carolina
- 15 Outdoor Environmental Classrooms in Oklahoma
- 16 Restoring Coastal Wetlands in Louisiana
- 17 Smart Growth Blossoms in Flower Mound, Texas
- 18 Stakeholders in the Planning and Zoning Process in Georgia
- 19 Treasuring Forests in Alabama
- 20 Where Rural Reigns: Purchase of Development Rights Program in Kentucky
- 21 Wildfire Preparedness in Mississippi
- 22 Working with Diverse Stakeholders in Newbirth, South Carolina
- 23 Zoning to Conserve Greenspace in Davidson, North Carolina

Presentation

- 5 Wildland-Urban Interface Case Studies

Evaluation Resources

- Trainer's Evaluation Form
- Evaluation Questions

Acknowledgments

A project of this complexity is only possible with the contributions of a great number of people. We have had the good fortune to work with many talented and thoughtful individuals who care about the future of forest ecosystems in the South. We are particularly grateful to our advisors for having a bold vision for natural resource agency professional development, to our authors who applied their expertise to the changing landscape of the wildland-urban interface, to all the reviewers who added suggestions that improved these materials, to pilot-test participants who helped us refine the program, and to the production team of research assistants, editors, designers, and web support specialists who converted the information into this useful product. We would also like to thank the Southern Group of State Foresters, the USDA Forest Service, the University of Florida, and the U.S. Fish and Wildlife Service for their financial and in-kind contributions that made this program possible.

The following list acknowledges the roles these people played in the development of *Changing Roles: Wildland-Urban Interface Professional Development Program*.

Project Director

Martha C. Monroe, University of Florida

Development Team

Martha C. Monroe, University of Florida

Lauren W. McDonell, University of Florida

L. Annie Hermansen-Báez, USDA Forest Service

Module 1: Wildland-Urban Interface Issues and Connections

Author:

L. Annie Hermansen-Báez, USDA Forest Service, Southern Research Station, Southern Center for Wildland-Urban Interface Research and Information

Contributors:

Lauren W. McDonell, School of Forest Resources and Conservation, University of Florida

Exercise 1.1: Piecing Connections Together

Exercise 1.5: Weaving Connections

Pete Colverson, The Nature Conservancy

Exercise 1.6: What Would You Do?

Video Production Team:

Brett Billings, Senior Field Producer, NCTC, U.S. Fish and Wildlife Service

Laura Jones, Education Specialist, NCTC, U.S. Fish and Wildlife Service

Lauren W. McDonell, Writer and Co-Producer, University of Florida

Reviewers:

Roger Boykin, Southeast Region, U.S. Fish and Wildlife Service

Barbara Loving, Office of Wildland Fire Coordination, Department of Interior

Edward A. Macie, USDA Forest Service

Richard Struhar, U.S. Fish and Wildlife Service

Kelley Van Druten, U.S. Fish and Wildlife Service

Susan W. Vince, University of Florida

Gary White, Georgia Forestry Commission

Module 2: Managing Interface Forests

Authors:

R. Bruce Hull, Rien Visser, and Sarah F. Ashton, Virginia Polytechnic Institute and State University

Contributors:

Robert Schmidt, School of Forest Resources and Conservation, University of Florida
Fact Sheet 2.5: Forest Health
James Parkhurst, Virginia Polytechnic Institute and State University
Fact Sheet 2.6: Wildlife
Susan W. Vince, School of Forest Resources and Conservation, University of Florida
Fact Sheet 2.7: Water Management

Reviewers:

Edward L. Barnard, Florida Division of Forestry
Brett Butler, USDA Forest Service
James Harrell, Florida Division of Forestry
William Hubbard, Southern Regional Extension Forester, University of Georgia
Alan J. Long, School of Forest Resources and Conservation, University of Florida
Edward A. Macie, USDA Forest Service

Module 3: Land-Use Planning and Policy

Authors:

Lauren W. McDonell, Terri Mashour, and Martha C. Monroe, School of Forest Resources and Conservation, University of Florida

Contributors:

Jay D. Tomlinson, College of Design, North Carolina State University
Presentation 3.2: Land-Use Planning
Presentation 3.3: Conservation Design
Exercise 3.4: Practicing Land-Use Planning
Exercise 3.8: Role-Playing Development Decisions
Fact Sheet 3.5: Subdivision Design
Josh McDaniel, School of Forestry, Auburn University
Case Study 18: Stakeholders in the Planning and Zoning Process in Georgia
Exercise 3.9: Background and Discussion Questions for Case Study 18

Reviewers:
