

ALLELOPATHY IN TREES AND FORESTS

A Selected Bibliography

Dr. Kim D. Coder, Daniel B. Warnell School of Forest Resources,
University of Georgia 4/99

Allelopathy in trees and forests is an important health care issue. Allelopathy is the chemical modification of the site by an individual to enhance interference effectiveness. Allelopathy also involves the ecological communications between species which can positively or negatively influence growth, behavior, reproduction, and survival of associated species.

To assist people in appreciating the scientific literature on this subject, this selected bibliography was developed. This bibliography is not intended to be all-inclusive of allelopathy research literature, but tries to include every major investigative trail being followed in the last few decades. Older works were not included because they are broadly cited in many current papers. This bibliography cites only those works in English.

This bibliography is for assisting professionals interested in allelopathy to quickly identify both original research papers and scientific review articles about allelopathy as related to trees and forests.

Ahlgren, CE, and Ahlgren, IF. 1981. Some effects of different forest litters on seed germination and growth. *Canadian Journal of Forest Research* 11:710-714.

al Humaid, AI, and Warrag, MOA. 1998. Allelopathic effects of mesquite (*Prosopis juliflora*) foliage on seed germination and seedling growth of bermudagrass (*Cynodon dactylon*). *Journal of Arid Environments* 38:237-243.

Bisla, SS, Nandal, DPS, and Narwal, SS. 1992. Influence of aqueous leaf extracts of eucalyptus and poplar on the germination and seedling growth of winter crops. *Proceedings of the First National Symposium on Allelopathy in Agroecosystems*, P. Tauro and S.S. Narwal editors., Indian Society of Allelopathy, CCS Haryana Agricultural University, Hisar, India. Pp. 95-97.

Boufalis, A, and Pellissier, F. 1994. Allelopathic effects of phenolic mixtures on respiration of two spruce mycorrhizal fungi. *Journal of Chemical Ecology* 20: 2283-2289.

Bramble, WC, Byrnes, WR, Hutnik, RJ, and Liscinsky, SA. 1996. Interference factors responsible for resistance of forb grass cover types to tree invasion on an electric utility right of way. *Journal of Arboriculture* 22:99-105.

Bremner, JM, and McCarty, GW. 1993. Inhibition of nitrification in soil by allelochemicals derived from plants and plant residues. *Soil Biochemistry* 8:181-218.
