

Redbay Wilt Risk Assessment Map For Georgia

Risk assessment for *Ophiostoma / Xyleborus glabratus* range expansion based upon combined climatic data (temperature, precipitation, and evaporation -- 30 year averages) and susceptible species present (Laurel family genera included were *Cinnamomum*, *Lindera* (3), *Litsea*, *Persea* (2), and *Sassafras*). The larger the number, the less the risk.
